EDUCATION

BACHELOR IN COMPUTER SCIENCE AND ENGINNERING

Dr.SMCE

2015-2021

PROFILE

Computer science graduate with some experience in both front-end and backend web development using ReactJS and Python frameworks, dedicated to being an efficient problem-solver and seeking opportunities to be a part of a team to further grow as a developer.

EXPERIENCE

FREELANCE WEB DEVELOPER

feb 2022 - Present

- Created website as per client requirements in React.
- Worked with Backend developers to implement API.
- Created restful API using Django.

PERSONAL PROJECTS

CONSULTANCY BACKEND 🐱

API for a consultancy website using Django rest framework. It has a role based user system where students can upload documents and have them verified by staffs of the consultancy. It is secured with JWT authentication system.

NIWAS 🐱

A real estate website created using Django for agents to post properties for rent. Used Django MVT structure together with CSS library for front-end.

COUNTER LEGENDS 🐱

A website built in React to show various information about characters of a popular game called League of legends as per data provided in the API.
